

APTUS AWARE 2.0

Accurate, timely and simple mobile messaging for frontline staff. Aptus Aware is the App that gets the right message delivered to right person with accuracy and accountability.

Dynamic workflow capability ensures staff get the message. Alarm fatigue is a real issue with legacy messaging systems but not with Aware, staff only receive relevant messages, dramatically reducing alarm fatigue. Message acceptance records who is responsible for response and all team members are notified of attendance. Unlimited escalation and auto-repost to other workgroups ensure no message goes unanswered.

In conjunction with Aptus BLE (Bluetooth Low Energy), Aptus Aware captures total elapsed time for any event. Workflow milestones are identified and recorded, call raised, staff accepted, in attendance, cancellation and completion. Time in attendance data gives greater insight to staffing requirements and incident resolution.

Facility support functions are also monitored such as room cleaning, maintenance, attendance and more. Granular detail of in room activity provides families confidence that support is provided in times of need.

With the most powerful messaging engine in the market Aptus Aware gets the message delivered.

Don't have Aptus yet? The time is right to upgrade, the Aptus solution provides for the latest features and functionality, including Wi-Fi, Poe (Power over Ethernet), BLE (Bluetooth Low Energy), RTLS (Real Time Location System), Auto presence, Duress, Voice to the bedside and more.

Aptus is a world class solution that can be delivered one component at a time. Take the time to work within your budget now, knowing that we can refurbish one room, one wing or your entire facility at your pace, putting an end to the expensive upgrades that the industry has suffered with for decades.

The Aptus solution is best of breed whether it be Wi-Fi or Poe, we are delivering tomorrow's technology today.

UPGRADE TO APTUS TODAY WHERE THE POSSIBILITIES ARE ENDLESS.
