

AIR WIFI - FUTURE TECHNOLOGY FULLY WIRELESS

Aptus Air

Wi-Fi is the wireless technology of today. With voice, video and data all sharing the wireless world, now there is a nurse call solution that leverages off your investment in a wireless network. With Wi-Fi comes the freedom of choice and location, sites are no longer bound by building constraints or legacy locations, the Wi-Fi network blankets the site and allows for new locations without ugly cabling or ducting.

Aptus Air is the next generation of Wi-Fi nurse call, with extended battery life, better monitoring and improved connectivity, **Aptus Air** is the right choice for your facility.

The air series works over the 2.4Ghz wireless LAN and is software configured to meet your exacting specifications, from check in time to temperature monitoring, the over the air updates allow features to be enabled without entering the room. Simply send out the update and the call station will accept and acknowledge the update on the next check in.

IP67 (complete protection against dust, and protection against water immersion up to 1m and for up to 30 minutes) rated call stations for wet areas ensure that in the harshest of

conditions, the nurse call button will survive. Many systems claim IP67 capability but few can provide the certification.

With **Aptus Air** Wi-Fi call stations combined with RTLS nurse call messages can be directed to the nearest available staff member, reducing time and distance in response.

Wi-Fi provides the flexibility of wireless with the confidence of a bi-directional, acknowledged connection.

Aptus Air is nurse call without limitation.

Aptus Air portable pendant provides freedom and confidence to those on the move. Working on the same standards as other devices in the Aptus Air series, the portable pendant gives reliable access to nurse call anywhere with Wi-Fi coverage. With in excess of one year's battery life under typical use cases and user serviceable batteries, you can feel confident that you will never be without nurse call. Easy to operate for the visually impaired and with a concealed cancel button making accidental cancelling a thing of the past. The new Aptus Air portable pendant provides freedom and confidence for all users.

THE NEXT GENERATION OF INTEGRATED SOLUTIONS FOR THE HEALTHCARE INDUSTRY

APTUS CMS

The **Aptus CMS** is a new generation of critical messaging. With native integration to nurse call, email, SMS, Android App, Spectralink (including Pivot), FIP, CCTV and access control, the **Aptus CMS** can inform staff of any critical alarm, allowing management to maintain operations and more critically react to important events in a timely and informed manner.

APTUS AWARE

With Alexys **Aptus Aware** working in conjunction with your Aptus CMS (Critical Messaging System) you will never miss a critical event. The Aptus CMS integrates alarms from many critical systems such as Nurse Call, Fire Alarm, Intruder Alarm, BMS and more. All of your critical alarms can be delivered directly to your Android device. The **Aptus Aware** App delivers the right message to the right person, on time, every time.
