CMS - A TRUE ENTERPRISE SOLUTION

Sitting at the very heart of the Alexys Aptus infrastructure lies the CMS, a micro server control engine seamlessly enabling communication with other critical facility systems. From Alexys designed and manufactured solutions to 3rd party Access Control, BMS, CCTV, Paging, DECT, Vocera and much more. The Aptus CMS is at the forefront of context aware messaging and integration, always delivering the right message to the right person across the entire property and beyond.

The Aptus CMS is backwardly compatible with most legacy nurse call systems including many popular devices that still use serial communications.

For convenience, additional security, and redundancy, collected CMS traffic may be stored on a separate 'cloud' server. This data can be readily accessed in its raw form or presented in a dashboard style report using Microsoft Power BI to provide greater visualisation and benchmarking of alerts and their subsequent remedial actions.

For a technically superior, customisable, critical messaging solution, look no further than the CMS from Alexys International.

APTUS
CONNECTING PEOPLE

THE NEXT GENERATION OF INTEGRATED SOLUTIONS FOR THE HEALTHCARE INDUSTRY

APTUS UNITY

Aptus Unity builds on the success of Aptus Pro and Aptus Air, leading the way to a new generation of intelligent Wi-Fi and PoE hardwired nurse call. The **Aptus Unity** system delivers the wireless communication of the future with the reassurance of hard wiring and multi-path communications, providing industry leading fault tolerance and operational reliability.

Aptus Unity is the world's first highly available intelligent nurse call system. The true IP + PoE call station is designed for use in hospitals and aged care facilities with optimisation for connectivity, security, reliability, and versatility, with the best power and RF performance for a wide variety of applications.

APTUS AIR

Wi-Fi is the wireless technology of today. With voice, video and data all sharing the same wireless world, **Aptus Air** is a nurse call system that leverages off your investment in a wireless network. Wi-Fi comes with the freedom of choice and location, sites are no longer bound by building constraints or legacy locations, the Wi-Fi network blankets the site and allows for new locations without ugly cabling or ducting.

APTUS PRO

Aptus Pro Au Series Hybrid IP is an Australia Standard AS3811 compliant nurse call solution. Designed to meet the needs of both acute and aged care. **Aptus Pro** is built on proven technology and based on industry standards. With the convenience of user serviceable components, hot swappable call stations and intuitive programming, the **Aptus Pro** solution is the preferred choice of sites seeking to reduce their maintenance costs.

APTUS AWARE

With Alexys Aptus Aware working in conjunction with your Aptus CMS, you will never miss a critical event. The Aptus CMS integrates alarms from many critical systems such as Nurse Call, Fire and Intruder Alarms, BMS and more. All of your critical alarms can be delivered directly to your Android device. The **Aptus Aware** App ensures the right message reaches the right person, on time, every time.
